

# emsCharts Gold Release Notes - v5.1.30.0 - July 23, 2018

## emsCharts v5.1.30.0 (Sprint 29,30)

### Improved in This Release

The following issues have been addressed and resolved in this release:

EMC-5397	Gold - Gestation Undefined	Fixed bug that prevented saving Page 5 Obstetrics in certain situations.
EMC-5318	MDB Download links to wrong downloader	Fixed download link for MDB Archives.
EMC-5287	Delete from Other EMS, Previous Code Needs Updated	Special case of deletion of Other EMS on Scene corrected, field now saves/deletes appropriately.
EMC-5247	Undefined Variable in pr_shared_queries	Fixed bug where a specific QA flag permissions combination caused an error viewing pages in a patient record.
EMC-5233	P5 - Secondary Assessment - Not Saving "Completed" Sections	Fixed bug that prevented highlighting of selected areas of the assessment to save upon page refresh.
EMC-5213	Saved Reports are auto-running without allowing user to enter date range	Corrected a bug that displayed an error when running a report with no dates.
EMC-5206	Gold - Exposure auto populating	Fixed bug that would show all crew members as being exposed on the entire chart view. Now only crew members with saved data will show.
EMC-5143	P1 - Add Patient - Does Not Work	Fix to resolve an issue when, depending on configuration, the "Add Patient" button did not work.
EMC-5131	P1 - Crew Roles - Not Printing Multiple Roles for Crew Member	Fixed bug that did not accurately display multiple roles per crew member where applicable on the printed chart.
EMC-5122	Gold - Patient Page - CMS Condition Code Dropdown Does Not Populate	Fix to Patient Page - CMS Condition Code drop down not having any visible selections.
EMC-5080	P5 - Obstetrics - Burns - Drains&Tubes Not Displayed	Fixed tab selectors in page 5.
EMC-5049	Gold - Auditing/ Addl Security Web EKG Options	Added additional logging to the service web ekg configuration table to help identify where values are changing.
EMC-5027	P9 - Custom Validation Errors Blocking Chart Locking - Gold Only	Fix to resolve System, Symptom, Impression and Patient's Age not passing custom validation rule.
EMC-4982	Gold - Custom Times	Custom times no longer auto-populate if the charts have been configured to "Default Unused" under service configuration.

EMC-4976	Data Validations - Add "Is One Of", "Last Set Of Vitals"	<p>Added 3 new data validations options to the Code Table-Data Validation Actions for use in Custom Data Validations:</p> <p>Full Vitals:BP Full Vitals:HR Full Vitals: Resp</p> <p>Intended use: Administrators can set up these 3 validations in any configuration or combination they choose (individual or in a set, or as warnings, required, or special report). It'll compare the last time that the particular vital was recorded, and compare them to the Arrive Receiving Date on the chart, and validate them in the number of minutes as set by the administrator.</p> <p>If the particular vital is blank, it defaults the value to 9999 minutes and will fail validation.</p>
EMC-4894	Gold - Change Layout for calculating mileage returned from Google routing	Added the ability to calculate distance via Google API when selecting a referring and receiving geocoded hospital.
EMC-4487	Selecting Hospitals - Nothing happens when clicking on searched hospital.	Fixed bug in the CAD import window for mapping hospitals where nothing happened after clicking a hospital or "none".
EMC-2644	CMS Service Level Logic - ALS Assessment	Updated CMS billing logic to correctly identify ALS/BLS charts in some fringe cases.
