**New in This Release**

The following new features are the most impactful for users, so we describe them here

Jira Key	Release Notes
<a href="#">EMC-6633</a>	Added new field "Assessed by" on page 8 vitals activity log.
<a href="#">EMC-6780</a>	Added Custom Questions section to Special Report emails for Legacy and Gold.
<a href="#">EMC-6655</a>	Fixed bugs in Researcher for Gold. Added "Hospital Alerts" code table to System code tables. Added "Potential Registry" field to System and Command Fac. "Hospital Alerts" code table in order to auto populate the field in Page 8 based on the "Alert Type" selected. Added "Hosp. Notify - Method" list to Researcher. Added in "Hosp. Notify - Alert Type" System Defaults list to Researcher. Added "Sepsis" to System Defaults list. Bulk loaded all System Defaults into all existing Command Facilities as hidden. Command Facilities have the option to turn on and use any of the System Default options for "Hospital Alerts". Added "Smartphone App" to Hospital Notify Method list.
<a href="#">EMC-6858</a>	Added new configuration option to the units code table. This change allows to restrict units to a base. Affects homepage and page1 "units" and "base" selectors
<a href="#">EMC-6710</a>	Removed Page 8 NEMSIS Procedure Code Confirmation box, as it will auto-select an appropriate value, and alert the user to select only if a match cannot be made.
<a href="#">EMC-6587</a>	Updated Glasgow Coma descriptions to adhere to standards: <a href="https://www.glasgowcomascale.org/">https://www.glasgowcomascale.org/</a>
<a href="#">EMC-6555</a>	Added SCT procedure options for Page 8 Ventilator and Titrate procedures
<a href="#">EMC-6901</a>	Added check to suppress QA Flag emails if the crew member does not belong to same service that the chart belongs to.

EMC-6674	Added a new Cardiac Option for Defibrillation Pad Application
----------	---

### Improved in This Release

The following issues have been addressed and resolved in this release:

Jira Key	Release Notes
EMC-6864	Added a Hotfix back in for Gold and Legacy: replaced the download URL with the correct one.
EMC-6569	added the ability to go back to the homepage on time out screen.
EMC-6903	Fixed License/crew member bug on page1
EMC-6899	Fixed Ref MD Custom Reporting/Data Validation field
EMC-6322	<b>Renamed "outcome" in several places to read as "disposition" to match national standard</b>
EMC-6902	Made requested changes to the messages displayed in the Retrieving Attachments From Archive page.
EMC-6668	Fixed line breaks on the QA flag text
EMC-5002	Added NABC Stroke Scale Score to custom reporting / data validation
EMC-6510	Added an interface to update Webservice details for Florida EMSTARS v3.
EMC-6904	The chart header and footer now display correctly on chart print outs.

### Known Issues

The following issues have already been identified and will be addressed in a future release:

- Custom Reporting using large comment fields as the only or first field results in an error
- Bulk Advancing occasionally results in a timeout
- Patient Management phone numbers may not save. Related Clarification: In patient management, the patient's information is (*already*) automatically updated when the most recent chart is updated. This is a feature in order to best keep the patient management database up-to-date.

### Upcoming Enhancements

- Data Validation for Crew Roles & Ref MD fields to be improved
- NEMSIS 3 Procedure dropdown improvements and removal
- Last Neurological Baseline Seen to be renamed to Last Known Well to match EMS standards
- and more...
