emsCharts Release Notes for Tablet v1.4.6

Bug Reporting

For issues *not* mentioned in the Known Issues section, please file a bug report through an emsCharts Support Ticket

([Click Here To Open Support Ticket](#)) To get more information about emsCharts Tablet, please download our Tablet Quick Start Guide ([Click Here For Production Documentation](#))

Upcoming Enhancements

Our team is currently working to deliver a method to scan linear (UPC) and QV (2d) barcodes to populate chart data points. You should see this functionality in the upcoming builds barring any blocker/critical items that fail QA testing. In addition, you will start seeing a change to data points with drop down boxes. Data points with a higher number of available options will have the ability to search for values. – more information to follow in the next several weeks.

Important Build Information

Software Version 1.4.6 is the latest Mandatory updated that will need to be applied, you must uninstall any previously versions prior to download and installing this build.
